Analysis:

   After having two other people sort and label my cards I noticed that both of them used more generic categories to such as "Entertainment News" and "New/Upcoming Movies and Games." I thought that these may be a bit too generic for a site that is only focused on games and movies. So I stuck with "New" and "Upcoming" categories.

   In my final sort, I incorporated the suggested group "Editor Picks" which allowed me to categorize "Netfilx Picks" which I initially left out of my sort.

   Both people categorized "What I'm playing" and "What I'm watching" as more personal so I created a "My Profile" category for them.

   I also used the "Best of Lists" category that was suggested in one of the sorts.
